- Reduces mortality
- Can be used in combination with vaccines, ionophores and chemicals, as a part of the shuttle or rotation programs

# PhytoCoX

GRANULE

## Natural Shield Against Coccidiosis: Protect, Grow, Thrive

Coccidiosis is a costly poultry disease. Current control methods have drawbacks such as poor cross-species protection and drug residues in products.

PhytoCox is a revolutionary product designed to control coccidiosis in poultry. It is made from natural sources and has a safe margin that guarantees no adverse effects on your birds.

In addition, PhytoCox contains powerful antioxidant compounds that help control Eimeria infections, reducing the risk of lipid peroxidation in the intestinal mucosa.

PhytoCox has no contraindications due to its natural composition, making it safe for both breeders and commercial layers.

## Composition

*Clinically proven formulation containing Predefined ratio of Yucca, Calendula, Allium sativum, Tinospora cordifolia, Neem, Amla, Turmeric Oil and other Anticoccidial herbs.*

## Benefits

- Uniform granule helps in easy mixing with feed
