Gut

Gut Microbiome Enhancement

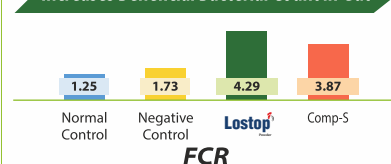

Restore FCR

Promotes Weight Gain

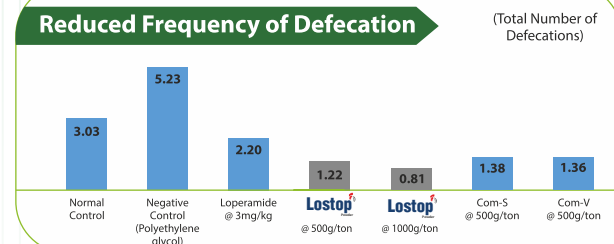

Increases Beneficial Bacterial Count in Gut

Beneficial Pathogenic

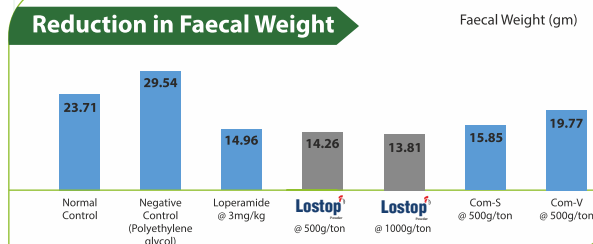

Effect on Frequency of Defecations by Lostop

Reduced Frequency of Defecation

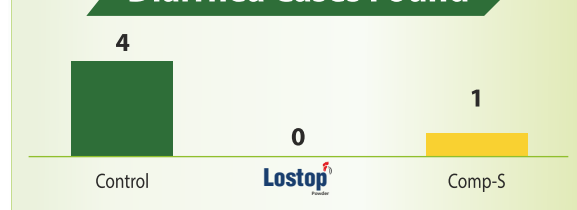

Enhances Gut Protection by Lostop

Reduction in Faecal Weight

No Diarrhea cases found in Lostop Group

Diarrhea Cases Found

Litter Moisture Reduced by 4.83% in Lostop Group

Reduction in Litter Moisture %

Treatment	Average Weight Gain in 42 Days	Cummulative Mortality in 42 Days	Cummulative Feed Consumption in 42 Days	FCR 42 Days	Litter Moisture %
Normal Control	2,679.7	2.81%	4,262.80	1.591	40.43%
Negative Control	2,596.9	3.10%	4,305.90	1.658	44.24%
Lostop	2,733.8	2.19%	4,361.20	1.595	35.60%
Comp-S	2,703.7	2.57%	4,414.20	1.633	38.28%

BENEFITS

Natural and Effective: Harnessing the power of natural ingredients, offering a safe and reliable solution without the use of harsh chemicals.

Combat Multiple Causes: Addressing bacterial, viral, and parasitic causes of diarrhea, ensuring comprehensive protection for your animals.

Optimal Digestive Health: Regulating bowel movements, reducing inflammation, and protecting the intestinal lining for healthier digestion.

Reduce Stress: Assist in reducing gastrointestinal related stress issues in livestock

Proven Results: Backed by scientific research validating the efficacy of each ingredient in combating diarrhea in livestock.

Environment Friendly

Lostop harnesses the power of nature with a blend of Punicalagin, Ellegic acid, Azadirachtin, Holarrhena antidysenterica, Acacia nilotica, Aegle marmelos (gallic acid, ellagic acid, ethyl gallate, and galloyl glucose), Kaolin, and Alum forms a powerful shield against diarrhea. No harmful chemicals, just pure, natural protection

RECOMMENDED DOSAGE : (Gm Per MT of Feed)

	Broiler	Layer	Breeder
For Prevention :	750 - 1000	400 - 500	500 - 1000
For Control :	2000-2500	1000-2000	2000-3000

Or depending upon the severity, with or without antimicrobials depending upon type of diarrhea or as recommended by nutritionist

Indications:

To prevent/control the non-infectious diarrhea

As supportive to treat infectious diarrhea along with specific treatment
